

# California Compliance List

## What are T20 and T24/JA8?

**Title 20 (T20)** is a set of efficiency regulations governing the sale of appliances in California. State-regulated lamps, small diameter directional lamps, and general service are all subject to these regulations. If an item is marked with a ✓ under the T20 column below, it is listed on the California Modernized Appliance Efficiency Database System as T20 compliant and is approved for sale.

**Joint Appendix 8 (JA8)** is part of California's Title 24 (T24) building code that governs new residential construction. If an item is marked with a ✓ under the T24/JA8 column below, it is listed on the California Modernized Appliance Efficiency Database System as T24/JA8 compliant and is approved for sale.

**Please note that items may be T20 compliant without being T24/JA8 compliant and that items may be T24/JA8 compliant without being subject to T20 regulations.**

Check back often for updates. If the LED lamps, light engines, downlights, and fixtures you are looking for are not on this list, please contact us, and we will make every effort to evaluate compliance.
